EDUCATION

The University of Manchester Sep 2021 – Jun 2025 | Manchester, UK

BSc(Hons) Artificial Intelligence with Industrial Experience Machine Learning · Computer Vision

- 1st year: **90%** grade, **ranked 2nd/486** first-year CS students, **Golden Anniversary and Netcraft awards.**
- 2nd year: **86%** grade (First-Class Honours), attending Prof. Tim Cootes' Computer Vision reading group.
- Summer schools: **Oxford ML** (2023), **Cambridge AI in healthcare** (2022), **EEML** (2022).
- Selected courses: Intro to AI, Machine Learning, Probability, Knowledge-Based AI, Computation, Visual Computing.

Grigore Moisil Theoretical High School Sep 2017 – Jun 2021 | Timisoara, Romania

Computer Science and Mathematics Algorithms · Data Structures · Mathematics

- Romanian Baccalaureate with 10/10 in Mathematics and in Computer Science, valedictorian.
- National Olympiad in Mathematics (**Bronze** in 2021) and Informatics (2021, **qualified 9th** in 2020, **Bronze** in 2018).
- Quantum Computing course organized by IBM (credential), **English C1** (IELTS credential)

EMPLOYMENT

FiveAI – acquired by **Bosch** Jun 2023 – Jun 2024 | Cambridge, UK

Research Engineer Intern Autonomous Driving · Multimodality · Explainability · PyTorch

- Published a paper [1] on **multimodal fusion** for 3D object detection in autonomous driving.
- Implented **explainability techniques**, demonstrating enhanced complementarity between modalities.

Rayscape Jul 2021 – Jul 2023 | remote, part-time

Research Engineer Medical imaging · Domain generalization · Segmentation · PyTorch

- Reduced the out-of-domain gap in multi-label chest X-ray classification by 32% for two covariate shifts [2].
- Improved the metrics of a **nodule malignancy classification** algorithm by 3% using Vision Transformers.
- Developed a **CE-marked algorithm** for segmenting nodules on lung CT scans that has helped **radiologists from over 100 medical institutions** fare better at diagnosing lung cancer by providing precise measurements.
- Implemented a segmentation refinement mechanism that **halved the previous error** of the predicted measurements.

Rayscape Mar 2020 – Sep 2020 | Timisoara, Romania

Machine Learning Intern Medical imaging · Classification · PyTorch

- Developed an algorithm for **detecting intracranial haemorrhages** which **sped up the triaging process.**
- Built models for lung segmentation, pathology classification and foreign objects detection on chest X-ray scans.

PROJECTS

Manchester University Data Science Society Jun 2022 - Present

- As a **workshops executive** , I am teaching an introductory course on Medical Image Analysis using CNNs.
- Prepared a Jupyter Notebook consisting of a PyTorch pipeline used to train an organ classification model.

Citadel European Datathon Apr 2023

- Analysed 1.8 million traffic stops in Philadelphia to identify racial disparities in policing, using Plotly and Pandas.

SaferWalk – first-year team project Oct 2021 - May 2022

- Improved Flask API throughput by 4x, predicting safer pedestrian routes, using an optimised implementation of A*.

Climate Hack.AI – ranked 6th/25 top universities in UK, US and Canada. Jan 2022 – March 2022

- Developed a **video generation** model for predicting solar photovoltaic power production using satellite images.
