Alexandru Buburuzan

alexbubu.com · google scholar · alexbubu@robots.ox.ac.uk · linkedin.com/in/alexbubu

Education

University of Oxford — Oxford, UK · *Oct 2025 – present*

DPhil (PhD) Autonomous Intelligent Machines and Systems

- Fully funded

University of Manchester — Manchester, UK · *Sep 2021 – Jun 2025*

BSc (Hons) Artificial Intelligence with Industrial Experience

- Dissertation supervised by Prof. Tim Cootes: *''Reference-Guided Diffusion Inpainting for Multimodal Counterfactual Generation.''*
- Ranked 1st/270+ in year 1, **Top 1%** in year 2; Golden Anniversary and Netcraft awards (see full transcript).
- Conferences: CVPR'25, MICCAI'23. Summer schools: Oxford ML (2023), Cambridge AI Med (2022), EEML (2022).
- Selected courses: Machine Learning, AI & Games, Knowledge-Based AI, Multivariate Statistics, Visual Computing.

Grigore Moisil Theoretical High School — Timisoara, Romania · *Sep 2017 – Jun 2021*

- Valedictorian; Romanian Baccalaureate with 10/10 in Mathematics, Informatics.

Employment

FiveAI – acquired by Bosch

Research Scientist Intern — Cambridge & Oxford, UK · *May 2025 – present*

- Ongoing work on Vision Language Action Models (VLAs) for autonomous driving supervised by Dr. Puneet Dokania.

Research Engineer Intern — Cambridge, UK · *Jun 2023 – Jun 2024*

- *Main project:* developed a new diffusion model for camera-lidar object inpainting in driving scenes [1] – patent filed.
- Fine-tuned Paint-by-Example for multimodal generation with 3D control, resulting in **13% LPIPS improvement**.
- *Other project:* co-authored a paper [2] on multimodal sensor fusion for 3D object detection in autonomous driving.
- Implemented explainability and interpretability techniques, demonstrating enhanced camera-lidar complementarity.

Rayscape

Research Engineer — Remote · *Jul 2021 – Jun 2023*

- *Main projects:* developed a CE-marked algorithm for lung nodule segmentation, **deployed in over 100 hospitals**.
- Devised a method reducing the out-of-domain gap in multi-label chest X-ray classification by 28% for two shifts [3].
- Developed a nodule malignancy classifier, improving F1 score by 3% using Vision Transformers.
- *Other projects:* contributed to the statistical analysis for a clinical study published in Nature Scientific Reports [4].
- Proposed an adaptation of the Detection Transformer to pathology detection which led to 4.6% mAP increase [5].

Machine Learning Intern — Timisoara, Romania · *Mar 2020 – Sep 2020*

- *Main project:* developed an algorithm for detecting intracranial haemorrhages which **sped up the triaging process**.

Experience

Manchester University Data Science and AI Society

President — *Sep 2024 – Feb 2025*

- Led a team of ten to organise ML workshops and introduced a new spotlight series of academic talks.
- Partnered with Entrepreneurs First to host their first UoM event and was selected as a GirlsWhoML campus coordinator.

Workshops Executive — *Sep 2022 – Jun 2024*

- Taught workshops on computer vision for medical image analysis and self-supervised learning with SimCLR.
