## **EDUCATION**

## The University of Manchester

Sep 2021 – Jun 2025 | Manchester, UK Machine Learning Computer Vision

BSc(Hons) Artificial Intelligence with Industrial Experience

- 1st year: 90% grade, ranked 2nd/486 first-year CS students, Golden Anniversary and Netcraft awards.
- 2<sup>nd</sup> year: **86%** grade (First-Class Honours)
- Summer schools: Oxford ML (2023), Cambridge AI in healthcare (2022), EEML (2022).
- Selected courses: Machine Learning, Probability, Knowledge-Based AI, Visual Computing, Data Science.

## Grigore Moisil Theoretical High School

Sep 2017 – Jun 2021 | Timisoara, Romania Algorithms Data Structures Mathematics

Computer Science and Mathematics

• Valedictorian: Romanian Baccalaureate with 10/10 in Mathematics, Informatics; IBM Quantum Computing course.

• National Olympiad in Mathematics (Bronze in 2021) and Informatics (2021, qualified 9<sup>th</sup> in 2020, Bronze in 2018).

#### **EMPLOYMENT**

### FiveAI – acquired by Bosch

Jun 2023 – Jun 2024 | Cambridge, UK

Research Engineer Intern

Multimodality Explainability PyTorch Autonomous Driving

- Improved BEVFusion by 2% mAP on the nuScenes dataset implementing the multimodal copy&paste augmentation.
- Co-authored a paper [1] on multimodal fusion for 3D object detection in autonomous driving.
- Implemented explainability techniques, demonstrating enhanced complementarity between modalities.

Rayscape

Jul 2021 – Jun 2023 | remote, part-time

Research Engineer

Medical imaging Domain generalization Segmentation PyTorch

- Developed a CE-marked algorithm for segmenting nodules on lung CT scans that has helped radiologists from over 100 medical institutions fare better at diagnosing lung cancer by providing precise measurements.
- Implemented a segmentation refinement mechanism that halved the previous error of the predicted measurements.
- Reduced the out-of-domain gap in multi-label chest X-ray classification by 32% for two covariate shifts [2].
- Proposed an adaptation of the Detection Transformer to pathology detection which led to 4.6% mAP increase [3].

Rayscape

Mar 2020 – Sep 2020 | Timisoara, Romania

Machine Learning Intern

Medical imaging Classification Object detection PyTorch

- Developed an algorithm for detecting intracranial haemorrhages which sped up the triaging process.
- Built models for lung segmentation, pathology classification and foreign object detection on chest X-ray scans.

#### **PROJECTS**

# Manchester University Data Science Society

Jun 2022 - Present

Workshop executive teaching introductory courses on computer vision and self-supervised learning using SimCLR.

## Citadel European Datathon

Apr 2023

Analysed 1.8 million traffic stops in Philadelphia to identify racial disparities in policing.

SaferWalk – first-year team project

Oct 2021 - May 2022

• Improved Flask API throughput by 4x, predicting safer pedestrian routes, using an optimised implementation of A\*.

<u>Climate Hack.AI</u> – ranked 6<sup>th</sup>/25 top universities in UK, US and Canada.

Jan 2022 - March 2022

• Developed a video generation model for predicting solar photovoltaic power production using satellite images.
